

I ask you to seriously consider rejecting NAB's petition 04-160. I have chosen to pay for XM's services because the current choices for radio are inadequate. America is about choices and free enterprise. I think limiting my ability to hear what I find necessary and willing to pay for is very upsetting. As with any business, if they cannot compete by providing the services the market demands, let them fail. They have the same opportunities as any one else to change. Why protect an industry that refuses to provide the service I desire.
